

704MDRF Polymer Ring Fan for Medium- and Heavy-Duty Truck Applications

The 704MDRF ring fan from BorgWarner Thermal Systems now lets you achieve maximum cooling performance while controlling noise both inside and outside the vehicle. This nine-blade polymer fan delivers up to 15% more airflow and 15% less weight than competitive products. The 704MDRF is ideally suited for use in applications demanding high performance coupled with quiet operation.

The 704MDRF ring fan is part of BorgWarner Thermal Systems next-generation product line of high-performance cooling fans.

BorgWarner Thermal Systems is a single point of contact for cooling system components for passenger car, SUV, light truck, medium-duty truck, heavy-duty truck, and off-highway applications. We work with original-equipment manufacturers around the world to provide a full range of direct-actuated Viscronic[®] fan drives, viscous fan drives, Kysor[™] on/off fan clutches, Cool Logic[™] heavy-duty multi-speed drives, polymer fans, and shutters.
